SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

Textiles are known to mankind since or earlier than 7,000 BC. The knowhow of textiles is older than metal working or pottery making. There are evidences that have been unearthed which has proved that people in Harrapan civilization knew weaving and spinning. Such is the age of textiles in India. In the medieval period, the evolution advanced a step further when William Lee invented the stocking frame, the first but hand- operated weft knitting machine.

But the real evolution of textiles in the field of technology happened in the industrial age. One name which finds worth mentioning over here is Sir Richard Arkwright. A visionary and doyen of his standards, he infused the much needed technology at that point of time to give spinning and weaving an industrial outlook through his inventions.

Our Company entered into such transactions due to easy proximity and quick execution. However, there is no assurance that we could not have obtained

better and more favourable terms, if our company has not entered into such related party transactions. Our Company may enter into such transactions in future also and we cannot assure that in such an event there would be no adverse affect on results of our operations. 9. The Company is dependent on few numbers of customers for sales from top 10 customers. Loss of any of this large customer may affect our revenues and profitability.

As per our books of Accounts, our top ten customers contributes almost 92.29% and 87.85% of our total sales for the period ended June 30, 2018 and for the year ended March 31, 2018 respectively. Out of which almost 47.65% and 68.81% was contributed by our group company/entity – “Axita Exports Private Limited” and “Aditya Oil Industries” for the period ended June 30, 2018 and for the year ended March 31, 2018 respectively.

Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

10. Any adverse movement in the price of the raw material may affect the price of the finished products and affect our profitability.

Seed Cotton (“Kapas”) is the main raw material used to produce cotton bales and cotton seeds. The price of the Kapas is very volatile subject to price fluctuations resulting from weather, natural disasters, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. Any adverse movement in the price of the Cotton will impact our cost of production which we may not be able to pass on to the customer which may affect our profitability of even lead to losses. Further any prolonged increase in kapas prices could have a material adverse effect on our Company over a period of time and affect all our strategies and future projections.

11. Being a production company, we have low net profit margins as compared to industry standards.

As company is engaged in the production of Cotton Bales and Cotton Seed, we have in the past reported net profit margins of 1.54%, 0.67%, 0.03%, 0.18%, -0.37% and 0.34% for the period ended on June 30, 2018 and financial year ending March 31; 2018, 2017, 2016, 2015 and 2014 respectively. Due to lower margins, we have lower EPS for our shareholders and may continue to do so. If the margins do not increase over time, we may continue to earn lower profits on higher revenues resulting in slower growth and affect overall financial condition. The management believes that lower margins are mainly due to non-compromise on quality and compliance which is beneficial in the long run. If we are unable to increase our margins, it may affect our growth prospects, profitability, operations and overall financial condition along with ability to absorb the fixed costs, if any, for the producers of new and innovative products.

12. Excessive dependence on Oriental Bank of Commerce for obtaining financial facilities.

Our entire fund based and non-fund based financial assistance has been sanctioned from Oriental Bank of Commerce (“OBC”). As on date of offer document, OBC has sanctioned CC limit of ₹1100 Lakhs with additional peak CC Limit of ₹ 400.00 Lakh. We have been sanctioned the financial assistance on the security of assets and personal guarantee of our Promoter and Promoter Group member. Any default under such arrangement or non-renewal or renewal of the sanction on adverse term with such lender may result into difficulty in arranging of funds for re-payment and may also adversely affect our operations and financials. Also we have provided the collateral security of our registered office and factory for the above loan taken from Oriental Bank of Commerce. For further details on the Credit Limits and other banking facilities, please see para titled “INDEBTEDNESS” on page no. 85 of the Draft Prospectus. In case of any default under our loan agreements, the personal guarantees provided by our Promoter and Promoter Group Member may be invoked which could negatively impact on the reputation and networth of our Promoter, which could subsequently affect our result of operations and financial condition.

13. All our production facilities are located at Kadi, Gujarat. Any disruption in the operations due to supply of power, fire outages or industrial accidents at the unit could hamper or delay our ability to continue production and servicing.

Our production facilities is located at Kadi, Gujarat. There is a power cut off for 5 to 6 hours once in a week, generally on every Thursday. Any disruption in the operations due to supply of power, fire outages or industrial accidents at the unit could hamper or delay our ability to continue production and servicing. Any disruption or suspension in the production process in this facility can significantly impact our ability to service customer needs and relation with our customers and have a material adverse effect on our business, revenues, reputation, results of operation and financial condition.

14. Our Company has taken unsecured loans that may be recalled by the Directors cum Promoters and their relatives at any time.

Our Company have currently availed unsecured loans which may be called by such lenders at any time. As at June 30, 2018, the unsecured loan amounting ₹ 499.43 Lakh were due to our Directors cum Promoters and their relatives. Moreover, as per books of accounts, as at October 31, 2018, company has already repaid unsecured loan of ₹ 316.06 Lakhs to such lenders. In the event that such lenders seeks further repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. Also there is no formal agreement with such lenders. As a result, any such demand may affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, please refer “Annexure – B(B)” “STATEMENT OF TERMS & CONDITIONS OF UNSECURED LOANS” - under chapter titled “RESTATED FINANCIAL INFORMATION” on page no. 122 of Draft Prospectus.

15. Our Company has not entered into any supply agreement for the major raw materials required for production of our products. Volatility in the prices and non-availability of these raw materials may have an adverse impact in our business.

Our major raw material for production of cotton bales and cotton seed is seed cotton which we buy from suppliers; these raw materials are generally purchased from various farmers, APMC Markets and traders. We do not have any agreement with the suppliers of raw materials. Therefore, any significant increase in the prices of these raw materials due to any reasons, and our inability to pass on increased costs of raw material to our customers or reduction in demand from our customers, may adversely affect our sales and profitability. For further details of various raw materials required, see chapter titled “BUSINESS OVERVIEW” on page no. 76 of this Draft Prospectus.

16. Our revenues are significantly dependent upon sales of our main products that are cotton bales and cotton seed.

Our core business is the production of cotton bales and cotton seed. Consequently, our income is significantly dependent on sales of the cotton bales and cotton seed and over the years, such sales have emerged as the major contributor to our revenue and business. Our continued reliance on sales of our products for a significant portion of our revenue exposes us to risks, including the potential reduction in the demand for such products in the future; increased competition from domestic and regional producers; cost-effective technology; fluctuations in the price and availability of the raw materials; changes in regulations and import duties; and the cyclical nature of our customers’ businesses. One or more such reasons may affect our revenues and income from sales of our products and thereby adversely affect our business, profitability, cash flows and results of operations.

18. Our revenues derived from sales in the export market are limited to few regions. Our growth strategy to expand into new geographic areas outside India and within India poses risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.

Our operations have been geographically concentrated in the few of States of India. Our export market is limited to a few regions like Bangladesh, Vietnam and Pakistan. Our total export sales for the financial year 2017-18 amounted to approximately 13.45% of the total sales. Our business is therefore to a small extent dependent on the general economic condition and activity in the international market in which we operate along with the Government policies relating to plastic industry in all these regions, including central, state and local government policies in India.

We may expand geographically in the domestic and international market, and may not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This may place us at a competitive disadvantage and limit our growth opportunities. We may face additional risks if we undertake operations in other geographic areas in which we do not possess the same level of familiarity as competitors. For example, expanding our scope by marketing our products in the regulated markets may prove difficult due to the stringent norms and we may have to discontinue our activities in such areas. If we undertake operations in different geographical locations than those currently is; we may be affected by various factors, including but not limited to:

- Adjusting our products to the new geographic area;
- Ascertaining the creditworthiness of the buyer and maintain credit terms with the same;
- Obtaining necessary Government and other approvals in time or at all;
- Failure to realize expected synergies and cost savings;
- Attracting potential customers in a market in which we do not have significant experience; and
- Cost of hiring new employees and absorbing increased costs.

Any failure to manage all above risk may have a material adverse effect on our revenues, profits and financial condition.

19. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Modernization and technology up gradation is essential to reduce costs and increase the output.

Our production technology may become obsolete or may not be upgraded timely, hampering our operations and financial conditions. Although we believe that we have installed plant and machineries with the latest upgraded technology suitable for cotton yarn production, we shall further continue to strive to keep our technology updated. In case of a new found technology in the industry we may be required to implement new technology employed by us which will render our current technology obsolete. Further, the cost in upgrading our technology may be significant which could substantially affect our finances and operations. For further details, please refer to section titled “BUSINESS OVERVIEW” beginning on page no. 76 of this Draft Prospectus.

20. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled “OBJECTS OF THE ISSUE” on page no. 60 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

21. Our business depends on our production facility and the loss of or shutdown of operations of the production facility on any grounds could adversely affect our business or results of operations.

Our production facilities are subject to operating risks such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output, raw material shortage or unsuitability, obsolescence, labour disputes, strikes, lock-outs, non-availability of services of our external contractors, earthquakes and other natural disasters, social unrests, industrial accidents, our ability to respond to technological advances and emerging industry and safety standards and practices in the industries in which we operate and propose to operate on a cost-effective and timely basis and any other factors which may or may not be within our control and also we need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition, results of operations and the trading price of our Equity Shares may be adversely affected by any disruption of operations at our facilities, including due to any of the factors mentioned above.

22. Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Although, we have entered into contract for supply of contractual labour but there is no certainty that we will be able to get the requisite amount of manpower whenever required. Though we have not faced any labour problem in the past, we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

23. Our operations may be adversely affected by strikes, work stoppages or increased wage demands by our employees or our contractors’ workforce or any other industrial unrest or dispute.

While we have not experienced any industrial unrest or dispute in our production unit in the past, we cannot be certain that we will not suffer any disruption to our operations due to strikes, work stoppages or increased wage demands in the future. Further, if our work force in our unit unionizes in the future, collective bargaining efforts by labour unions may divert our management’s attention and result in increased costs. We may be unable to negotiate acceptable collective wage settlement agreements with those workers who have chosen to be represented by unions, which may lead to union-initiated strikes or work stoppages. Any shortage of skilled and experienced workers caused by such industrial unrest or disputes may adversely affect our business, results of operations and financial condition. Further, under Indian law, we may be held liable for wage payments or benefits and amenities made available to “daily wage” workers. Any requirement to discharge such payment obligations, benefits or amenities or to absorb a significant portion of the “daily wage” workers on our own rolls may adversely affect our business, results of operations and financial condition.

24. Any inability on our part to maintain quality standards could adversely impact our business, results of operations and financial condition.

Quality control is vital element for our sector. Any rapid change in our customers’ expectation on account of changes in technology or any other reason and failure on our part to meet their expectation could adversely affect our business, results of operations and financial condition. Any failure on our part to successfully meet customer demand or preference may negatively affect our business, results of operation and financial condition.

25. In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies/Entities.

Our Promoters – Directors are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoters and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity which may be or may not be at Arms’ Length Price and in Ordinary Course of

Business. If the transactions are executed not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company with our Promoters, Directors and Group Companies/Entities during last five years, please refer to the "Annexure – T" - "RELATED PARTY TRANSACTIONS" under the Chapter titled "RESTATED FINANCIAL INFORMATION" beginning on Page No. 122 of this Draft Prospectus.

26. We have experienced negative cash flows in previous years / periods. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial condition.

Our Company had negative cash flows from our operating activities, investing activities as well as financing activities in the previous years as per the Restated Financial Statements and the same are summarized as under.

27. Our Object has not been appraised by any Bank or Financial Institution. Any significant deviation in the Object could adversely impact our operations and sustainability in absence of any independent monitoring agency.

We have estimated fund raising to the extent of ₹ 1051.20 Lakh to finance the 'Objects of the Issue' (including Issue Expenses). The proposed objects for which the funds are being raised have not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on management estimates. There is no guarantee that our estimates will prove to be accurate and any significant deviation in the project cost could adversely impact our operations and sustainability in the absence of any independent monitoring agency. For details of the "OBJECT OF THE ISSUE", please refer page no. 60 of this Draft Prospectus.

As per SEBI (ICDR) Regulations, 2018, appointment of monitoring agency is required only if Issue size exceeds ₹ 10,000 Lakh. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the Companies Act, 2013 the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

29. Our company is using logo / trademark which is name of one of our promoter Mr. Kushal Nitinbhai Patel and is are currently pending for registration. Ther is no formal agreement is exeuted for using of such logo/trademark between our company and him.

At present we are using following logo/trademark, which is name of one of our Promoter Mr. Kushal Nitinbhai Patel. There is not formal agreement executed between our company and him. In future, he may disallowed our company to use the said logo/trademark which is still pending for registration.

Sr. No.	Authority Granting Approval	Application No.	Applicable Laws/Rules	Nature of Approvals	Status
1.	Trade Mark Registry, Government of India	3917633 dated August 16, 2018	Trade Marks Act, 1999	Use of following Mark as Registered Trademark under Class 22 - Raw Cotton And Cotton Processed Products 	Accepted & Advertised in Journal No. : 1869-0 dated October 1, 2018

Our company's business may be affected due to our inability to protect our future intellectual property rights. Currently, we do not have a registered trademark over our name and logo under the Trade Marks Act and consequently do not enjoy

the statutory protections accorded to a trademark registered in India and cannot prohibit the use of such logo by anybody by means of statutory protection. If approval of registration of trademarks are not granted from the appropriate authority, it can allow any person to use a deceptively similar mark and market its product which could be similar to the products offered by us, although we may have a claim on account of prior usage in such event. Any unauthorized usage by a third party of our logo may create confusion in the market as to our identity and/or may have a material adverse effect on our reputation, goodwill, business prospects and results of operation too. Such infringement will hamper our business as prospective clients may go to such user of mark and our revenues may decrease.

30. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject to and this may have a material adverse effect on our business.

While we believe that we maintain insurance coverage in amounts consistent with industry norms. If any or all of our facilities are damaged in whole or in part and our operations are interrupted for a sustained period, there can be no assurance that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption or the cost of repairing or replacing the damaged facilities. If we suffer a large uninsured loss or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and result of operations may be materially and adversely affected.

31. Our raw material and finished products both are highly flammable commodity. Any adverse situation at our factory or godown can have an adverse effect on our operations and profitability.

Cotton being a highly flammable commodity, every stage from procurement, processing, storage and transportation to trading is fraught with an imminent danger of an instant fire. The risk of fire hazard is increased due to increased automation and use of large volume of machinery for material handling. Any spark generated at these places can not only generate fire but also the same could propagate to other machines through cotton conveying. We maintain standard fires and perils policies in respect of the buildings, plant and machinery, stocks of goods, raw material and office equipment in our production facilities.

During the F.Y. 2015-16, fire was occurred in our production plant, resulting into loss of operations for few days which affected our performance in the said financial year. Any such incidents, if occurred in future at our factory, godown or at any other place could adversely affect our business, financial condition, cash flows and results of operations.

32. Any changes in regulations or applicable government incentives would adversely affect the Company's operations and growth prospects.

The Central and the State Government has provided several incentives to the textile sector, from which our Company may benefit, including the TUFS interest, electricity and capital subsidies. These incentives could be modified or removed at any time, or new regulations could be introduced which may change the current regime applicable to the textile industry as a whole which will affect our Company's business, this could adversely affect our Company's operations and financial results. Our Company is also subject to various regulations and textile policies, primarily in India. Our Company's business and prospects could be adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. Any such change could have a material adverse effect on the Company's operations and financial results.

33. We sell our products in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.

India is our primary market and we face competition in our business from local as well as nationwide producers and suppliers of Cotton Bales and Cotton Seed. There are a large number of players for production of same or similar products. Thus, competition in these markets is based primarily on demand and price. As a result, to remain competitive in our market, we must continuously strive to achieve operating efficiencies and secure our raw materials requirements. If we fail to do so, other producers and suppliers of similar products may be able to sell their products at prices lower than our prices, which would have an adverse effect on our market share and results of operations.

34. Our Contingent Liability and Commitments could affect our financial position.

As on June 30, 2018 we had Contingent Liability of ₹1160.00 Lakhs towards corporate guarantee to Aditya Oil Industries (group entity). We have given corporate guarantee in relation to certain debt facilities to our group entity which if claimed, may require us to pay the guaranteed amount. 35. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.

We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoters is unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacements, and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters, along with the key managerial personnel, have over the years built relations with various suppliers, customers and other persons who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

Furthermore, it is likely that our Company will enter into related party transactions in the future and omnibus approval is taken for related party transactions to be entered into FY 2018-19. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to “Annexure T” – “RELATED PARTY TRANSACTIONS” under section titled “RESTATE FINANCIAL INFORMATION” on page no. 165 of this Draft Prospectus and paragraph on Proposed Related Party Transactions with Group/Entities for FY 2018-19 as approved by the Shareholders/Audit Committee in the section “INFORMATION WITH RESPECT TO GROUP COMPANIES/ ENTITIES” beginning on page no. 194 of this Draft Prospectus.

In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Issue, refer chapter titled "OBJECTS OF THE ISSUE" on page no. 60 of this Draft Prospectus.

40. Our inability to manage growth could disrupt our business and reduce profitability.

A principal component of our strategy is to continuously grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

41. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

42. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

43. Our Group Entity have incurred losses in past and any operating losses in the future could adversely affect the results of operations and financial conditions of our group company.

Shreenathji Enterprise (Sole Proprietorship) has incurred loss during the financial year 2015-16, details of which is given below;

(₹ in Lakh)

Sr. No.	Name of Group Company/Entity	F.Y 2017-18	F.Y 2016-17	F.Y. 2015-16
1.	Shreenathji Enterprise (Sole Proprietorship)	6.82	17.73	(19.34)
2.	Suchi Developers (Partnerhisip Firm)	(3.13)	(2.98)	(3.10)

Further, few of our Group Company/entity have not started commercial activities. Any operating losses could adversely affect the overall operations of the group and financial conditions and also divert the attention of the management and promoter towards the group company which could have an adverse effect on our operations and financials. For more information, regarding the Company, please refer chapter titled "FINANCIAL INFORMATION OF OUR GROUP COMPANIES/ENTITIES" beginning on page no. 194 of this Draft Prospectus.

44. Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations.

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all, particularly where our plants or machineries are not readily available from the market or require services from original machinery manufacturers. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair.

45. Our business is dependent on the adequate and uninterrupted supply of electrical power at a reasonable cost.

Failure on account of unavailability of electrical power may restrict us in utilizing our full capacity and, hence, may impact our business and results of operation. Adequate and cost effective supply of electrical power is critical to our operations, which entails significant consumption of electrical power. Currently, we source of our power requirements from the State Electricity Board. There can be no assurance that electricity supplied by them will be sufficient to meet our requirements or that we will be able to procure adequate and interrupted power supply in the future at a reasonable cost. Further, if the per unit cost of electricity is increased by the state electricity boards, our power costs will increase and it may not be possible to pass on any increase in our power costs to our customers, which may adversely affect our

profit margins. Further we face weekly power cut at our production plant in Borisana, Kadi on Thursday usually for 5-6 hours which restrict us in utilizing our full capacity and, hence impact our business and results of operation.

46. Activities involving our production process can be dangerous and any industrial accident can cause injury to people or property in certain circumstances which could have an adverse effect on our production schedules, costs, revenue and ability to meet customer demand.

Our business involves production processes that can be potentially dangerous to our employees. An accident may result in loss of life, destruction of property or equipment, production or delivery delays, or may lead to suspension of our operations. While we believe we maintain adequate insurance, interruptions in production as a result of an accident may also increase our costs and reduce our revenue, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we or our senior management may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations and prospects. Any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations and prospects.

47. Our inability to effectively implement our business and growth strategy may have an adverse effect on our operation and growth.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

48. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

49. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

We depend on transportation services to deliver our products from the raw material site to our factory and from our factory to the site of the customer. We rely on third parties transportation service providers to provide such services. Any disruptions of transportation services because of weather related problems, strikes, lock-outs, inadequacies in road infrastructure or other events could impair our procurement of raw materials and our ability to supply our products to our customers. There is no assurance that such disruptions will not occur in the future. Any such disruptions could materially adversely affect our business, financial condition and results of operations.

50. Our Company has not carried out any independent appraisal of our working capital requirements.

Therefore, if our estimation is not accurate or the assumptions we have taken prove to be not correct, we may be required to raise additional debt on terms that may not be totally favorable to us. Our working capital requirements have been assessed based on the management's estimates and the same have not been independently appraised or evaluated by any bank or financial institution. Further, the estimates of our working capital requirement are totally based on the experience of our management and Promoters. We cannot assure that these estimates may be accurate. If these estimates prove to be wrong, we may be required to raise additional debt, on terms that may not be totally favorable to our Company, which may in turn adversely affect our profitability.

51. Certain data mentioned in this Draft Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

52. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in business of production of cotton bales and cotton yarn which attracts tax liability such as Goods and Service Tax and professional tax as per the applicable provisions of Law. However, we have deposited the required returns under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

53. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

We do not derive 100% of our revenue from our operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian and exporting countries economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. The total area sown under Rabi crops as on 19th January 2018 stands at 617.79 lakh hectares as compared to 620.99 lakh hectare during the same period in 2017. Agricultural credit in India has been growing consistently at above 17 percent annually during the last decade. During 2017-18, banks have disbursed ₹ 5.88 lakh crore (provisional as on 30th September, 2017) against the annual agriculture credit target of ₹10 lakh crore for 2017-18.

Ease of doing Business for Small Traders

GST has significantly raised turnover thresholds of Rs 20 lakh for an entity to be taxable in GST. Further, the threshold for composition has been increased in general to ₹ 1 crore (₹ 75 lakh for special category states except Jammu & Kashmir and Uttarakhand). Certain other measures taken to encourage the MSME sector are as follows:

- Service providers whose annual aggregate turnover is less than ₹ 20 Lakh (₹ 10 Lakh in special category states except J & K) have been exempted from obtaining registration even if they are making inter-State taxable supplies of services. This measure is expected to significantly reduce the compliance cost of small service providers.
- Small and medium businesses with annual aggregate turnover up to ₹ 1.5 crores would be required to file quarterly return (monthly for other taxpayers).

- iii. The reverse charge mechanism under subsection (4) of section 9 of the CGST Act, 2017 and under sub-section (4) of section 5 of the IGST Act, 2017 has been suspended till 31.03.2018.
- iv. The requirement to pay GST on advances received was proving to be burdensome for small dealers and manufacturers. In order to mitigate their inconvenience on this account, it was been decided that taxpayers having annual aggregate turnover up to ₹ 1.5 crores shall not be required to pay GST at the time of receipt of advances on account of supply of goods.

Rationalization of GST rate structure for goods

After implementation of GST regime, rates have been rationalized significantly to address the concern of trade and consumers. Major decisions on rate rationalization were taken by the GSTSC Council in its meeting on the 10 November, 2017.

INDIAN ECONOMY OVERVIEW

Growth is increasing, making India the fastest-growing G20 economy. Investment and exports, supported by the smoother implementation of the new goods and services tax (GST), are becoming major growth engines. Inflation will hover within the target band, with upside risks reflecting rising oil prices and an increase in housing allowance for public employees. The current account deficit will increase. Job creation in the formal sector will remain sluggish, leaving the vast majority of workers in low-productivity, low-paid activities.

Fiscal and monetary policies are projected to remain broadly neutral. To reduce the relatively high public debt-to-GDP ratio, containing contingent fiscal liabilities is key, including through better governance of public enterprises. Better risk assessment in banks would allow allocating financial resources to the best projects and avoiding a new increase in non-performing loans. Investing more in education and training, combined with a modernisation of labour laws, would help create better jobs and make growth more inclusive.

Recent Key Developments

1. HISTORIC TAX REFORM

The Goods and Services Tax (GST) came into effect across India from July 1, 2017. GST has turned all 36 states and union territories of India into one common market. By curbing cascading taxes, GST has also reduced the cost of local production. GST is expected to bring more businesses from the unorganised to the organised sector, thereby increasing efficiency and productivity and attracting more foreign direct investment (FDI).

Paying taxes has become easier in India because of factors like the introduction of GST and digitisation of processes. A fact that is captured succinctly in the World Bank Doing Business Report 2018. India improved its ranking on the Paying Taxes indicator in the report by 53 places.

2. DIGITISATION DRIVE

Systems from taxation to incorporating a company are being moved online. For example, on October 2, 2016, the Ministry of Corporate Affairs (MCA) introduced a simplified electronic form called SPICe that makes it possible to incorporate a company in India in just one day¹. In 2017, the Central Board of Direct Taxes tied up with the MCA to make Permanent Account Number (PAN) and Tax Deduction Account Number (TAN) available in a day to businesses that register through the SPICe electronic form.

A new online system has also streamlined the process for getting construction permits, reducing both the number of procedures and the time required to get a permit. This last step has improved India's ranking on the Construction Permits indicator of the World Bank Doing Business Report.

3. NEW INSOLVENCY CODE

Enacted on May 28, 2016, the Insolvency and Bankruptcy Code 2016 consolidates all rules and laws relating to insolvency into a single legislation and brings India's bankruptcy code on par with global standards¹. The code is designed to promote entrepreneurship—it enables companies to tide over financial difficulties and opt for restructuring while still fulfilling orders. It also promotes greater confidence among investors and increases availability of credit, by strengthening procedures.

By October 2017, more than 2,050 insolvency applications had been filed before the National Company Law Tribunal and 112 applications had been admitted. The code has helped India improve ease of doing business. India moved up 33 ranks in the Resolving Insolvency indicator of the World Bank's Doing Business Report in 2017.

4. INSTITUTIONAL REFORMS

A social revolution is brewing in India under the moniker JAM: Jan Dhan Yojana for financial inclusion, Aadhaar biometric identification and mobile telecommunications.

The Prime Minister's Jan Dhan Yojana (PMJDY) is a financial inclusion programme that makes services like banking, remittance and insurance available to every Indian at affordable cost. Beneficiaries can open a zero-balance account. As of August 16, 2017, 295 million new bank accounts had been opened under the PMJDY. More than 176 million of these accounts are in rural India, and around 145 million are operated by women.

Aadhaar is an ambitious biometric identification system. As of 2017, the Unique Identification Authority of India had issued a unique 12-digit Aadhaar number to more than 1.19 billion Indians, covering 99.9% adults in the country. Mobile-phone adoption has been impressive in India by any standards. Already there are more than 1 billion mobile phone subscribers in India. Plans are underway to deploy 5G services for consumers as early as 2020.

5. RADICAL CHANGES IN FDI POLICY REGIME

FDI liberalization in 87 policy areas across 21 sectors is paying off. On June 20, 2016, Government of India radically liberalized the FDI regime¹. The objective was to increase FDI inflow, of course, but also provide major impetus to employment and job creation. Now, most of the sectors are under automatic approval route. Sectoral caps across major sectors including defence and aviation have been increased to 100%. With these changes, India is now one of the most open economies in the world for FDI. In 2017, India retained its position as the World #1 Greenfield FDI destination.

6. INFRASTRUCTURE PUSH

Programmes to build infrastructure and connect India are picking up pace. New railway lines have been constructed in 2017 at an expenditure of Rs 4,531.93 crore. A five-year plan to build 83,677 km of roads has begun. Of this ambitious target, the Bharatmala Pariyojana programme will account for 34,800km of roads and create 14.2 crore mandays of jobs in the process. The remaining 48,877km will be developed by the National Highway Authority of India and the Ministry of Road Transport and Highways.

The Sagarmala Programme, on the other hand, focuses on connectivity by sea. It envisages a role for multiple central ministries and agencies as well as state governments to complete 415 projects in just 20 years till 2035. The projects are across port modernization, new port development, port connectivity enhancement, port-linked industrialization and coastal community development.

India gained 19 places in the World Bank's Logistics Performance Index 2016 ranking, the latest figures available at the time of publication.

7. TECHNOLOGY READINESS

More than 100,000 Gram Panchayats or Village Councils now have access to high-speed broadband, thanks to Government of India's BharatNet project. BharatNet is probably the world's largest rural broadband project. As on December 31, 2017, 254,895 km of optical fibre cable had been laid across 109,926 Gram Panchayats as part of the project. BharatNet is expected to make digital delivery of services for health, education, livelihood, skills training, e-agriculture and e-commerce available to the rural poor, in addition to generating massive employment opportunities.

Apart from BharatNet, India has more than 1 billion mobile phone subscriptions and 462 million Internet users. India improved its ranking on the Technology Readiness Pillar of the World Economic Forum's Global Competitiveness Index 2017 by three places.

8. RENEWABLE ENERGY

India is World #4 in terms of installed capacity to harness power from wind, and World #6 in terms of installed solar power capacity. As of November 30, 2017, solar energy projects capable of producing 16611.73MW had been installed in the country. In 2016- 17, India exceeded its target for wind power capacity addition by 38%, taking the total installed capacity to 32746.87 MW¹.

The Government of India has set an ambitious target to install 175 GW renewable power capacity by the end of 2022. This includes 60 GW from wind power, 100 GW from solar power, 10 GW from biomass power and 5 GW from small hydro power.

Road Ahead

In financial year 2018, despite this bumpy ride, India has managed to retain the tag of the world's fastest-growing economy. In fact, Asia's third-largest economy is expected to grow at a faster clip than all other major countries for the next three years, according to the World Bank. Recovery in private investments and strong growth in private consumption and services are expected to fuel growth over the next few years. While the economy seems to have overcome the debilitating effects of demonetisation, the recovery may be hamstrung by rising oil prices. A weakening rupee and the dismal job situation are the other key problems in the short-run.

Yet, the government has retained its forecast of 7.5% growth for financial year 2019. But global rating agencies are not as optimistic. On May 30, Moody's Investors Service cut India's GDP growth forecast for this financial year from 7.5% to 7.3%. Even Goldman Sachs group has revised India's growth projections from 8% to 7.6%. Now, it's to be seen if Team Modi can finally bring the promised acche din before the country votes in 2019.

TEXTILE INDUSTRY IN INDIA

Evolution of textile industry in India

Textiles are known to mankind since or earlier than 7,000 BC. The knowhow of textiles is older than metal working or pottery making. There are evidences that have been unearthed which has proved that people in Harrapan civilization knew weaving and spinning. Such is the age of textiles in India. In the medieval period, the evolution advanced a step further when William Lee invented the stocking frame, the first but hand- operated weft knitting machine.

But the real evolution of textiles in the field of technology happened in the industrial age. One name which finds worth mentioning over here is Sir Richard Arkwright. A visionary and doyen of his standards , he infused the much needed technology at that point of time to give spinning and weaving an industrial outlook through his inventions.

Coming back to the evolution at our own backyard, the Indian textile Industry has been ever growing. Where tradition, not fashion, rules, concentration on the aesthetic prevails instead of mere change. While India has been celebrated over

centuries for its fibre base, spinning techniques and weaving magic, it has slowly carved a distinct place for itself in home textiles products as well worldwide. The two world wars and the Swadeshi movement in India provided great stimulus to the Indian cotton textile industry. Although during the period 1922 to 1937 the industry was in doldrums which also witnessed a number of Bombay mills being changed hands. The cotton textile industry is rightly described as a Swadeshi industry because it was developed with indigenous entrepreneurship and capital and in the pre-independence era the Swadeshi movement stimulated demand for Indian textile in the country. Indian textiles industry is now a well-established one with showing significant attributes and a lustrous future. The country is the second biggest textiles manufacturer worldwide, right after China. The Indian textile industry is an integral part of the overall manufacturing sector of the country and is a major contributor to the country's economy. According to August 2014 reports, the sector contributes about 14 per cent to industrial production, 4 per cent to the gross domestic product (GDP), and 17 per cent to the country's export earnings. India's textile industry is also the largest in the country in terms of employment generation. It not only generates jobs in its own industry, but also opens up scope for the other ancillary sectors. Indian textile industry currently generates employment for more than 35 million people. The size of India's Textile technologies are undergoing a profound change. Textile structures in technical applications are creating a new market potential. Creative and successful considerations of textile investment in widely diverse fields will shape our future and provide assurance. The growth of the textile industry is not only limited to manufacture and export of garments. The growth and success of Indian textile industries lies in the vertical integration of the policies and framework which have helped manufacturers in domestically subjugating the entire process which also bears an impact on the overall cost like raw material treatment, captive power generation etc. This has also led to the in house production of cotton, jute etc to complement and support their own manufacturing portfolio. This again has an impact on the overall cost of the finished good. India is also home to almost one fourth of the spindle activities worldwide thereby coming second to China. Looming or we say looms as such is also a weapon in the armoury of the Indian textile industries as it covers an unprecedented 61 per cent share.

**A nep can be defined as a small knot (or cluster) of entangled fibres consisting either entirely of fibres (i.e. a fibre nep) or of foreign matter (e.g. a seed-coat fragment) entangled with fibres. In contrast to the loose arrangement of a worsted nep, a cotton nep generally has a tight formation and better spinning output in comparison with other raw cotton. This cotton gives more yarn output and better CSP (Count Strength Product) in spinning with good dye absorption.*

PRODUCTION PROCESS OF COTTON BALES AND COTTON SEED

STEP: 1 RAW MATERIAL PROCUREMENT

Major raw material for our Company is Kapas (Seed Cotton). Our production process starts with the procurement of raw material. This step involves identification of the vendor from whom the material is to be procured and the quantity of the material required. Once the Kapas is received from the vendor, it is tested for quality. The selection of raw material is based on factors like pricing, payment terms, availability and quality of Kapas. Grading and mixing of the raw material received from the vendor is done to get the desired quality/customized product. Conveyors are used to feed the Kapas into the ginning machines.

STEP: 2 GINNING

A Ginning machine uses the raw cotton (Kapas) received from the conveyors as Raw materials. Ginning is the first mechanical process involved in processing cotton. Ginning mill separates cotton fibers from the seed bolls and dust particles. The main application of ginned cotton referred to as lint is for spinning operations, where lint is converted to yarn. We produce quality cotton in our own Ginning and Pressing Unit.

The first step in the **ginning process** is when the **cotton** is vacuumed into tubes that carry it to a dryer to reduce moisture and improve the fiber quality. The separation process involves equipment like the separator, feeding hopper, fan with tubular air ducts. Separation of cotton and cotton seed from cotton is done with double roller ginning machine.

Processing Cottonseed: Cottonseed is separated from the lint during the ginning process. The seeds make up about 64% of the raw material, i.e. of seed cotton or KAPAS and Lint makes up approximately 34% of the raw material, i.e. of seed cotton or KAPAS. Cotton seeds are very valuable and are used for a variety of products such as cotton seed oil, and the remaining excreta which is cotton seed oil cake is used as cattle feed. The separated cotton seeds are transported out of the ginning Unit and lint of cotton received from the ginning machine are transported for further cleaning process through conveyors. The cotton seed produced is dispatched loosely to our customers and sometimes even packed.

STEP: 3 CLEANING

The lint cotton received from the ginning machine is sent for further cleaning. This process involves cleaning of the impurities; therefore it runs through cleaning equipment to remove leaf trash, sticks and other foreign matter.

STEP: 4 PRESSING

Cotton fibers are pressed to Bales by using the Hydraulic pressing machine. This step involves pressing of Lint cotton. In this process Lint cotton is used as Raw materials. After pressing is completed the bale is tightened and covered fully with cloth, after that the bale is weighed and kept in the hall safely.

Step: 5 Packaging, Storing and Dispatch

After pressing process, cotton bales are covered by protective cloth and stored on platform for dispatch. Cotton seeds are sold loosely to customers and sometimes packed in HDPE bags.

PLANT & MACHINERY

Our Production unit is equipped with all required machinery to achieve targeted production with various models of cotton storage with feeding machines, Lint belt conveyor plant, seed cotton pre-cleaner machine, Double Roller Ginning Machine, Auto feeder, cotton seed conveyor, elevators for cotton seeds, cotton seed cleaning machine, Cotton Bailing Press, Hydraulic cotton bailing press, Lint cleaner jumbo machine, Automatic Cotton Feeding system, raw cotton conveyor belt, cables, control panel, weigh bridge scale etc.

TECHNOLOGY

Our Company is having 48 Ginning machines for ginning and pressing operations, pre cleaner, lint cleaner, kapas conveyor system, lint conveyor system, hydraulic cotton bailing press, conveyor for seed, electrical infrastructure, humidifier and weigh bridge etc.

Micro, Small and Medium Enterprises Development Act, 2006

The Micro, Small and Medium Enterprises Development Act, 2006 as amended from time to time (“MSMED Act”) seeks to facilitate the development of micro, small and medium enterprises. The Union Cabinet has approved amendment to Micro, Small and Medium Enterprises Development (MSMED) Act, 2006 for classifying MSMEs from current investment in plant and machinery criteria to annual turnover criteria. The purpose of amendment to Section 7 of MSMED Act, 2006 is to encourage ease of doing business, make MSME classification norms growth oriented and align them to new indirect tax regime revolving around Goods & Services Tax (GST). This will define units producing goods and rendering services in terms of annual turnover. It will pave the way for increased direct and indirect employment in the MSE sector of the country.

- a. where the annual turnover does not exceed Rupees Five Crore, an enterprise shall be regarded as a micro enterprise;
- b. where the annual turnover is more than Rupees Five Crore but does not exceed Rupees Seventy Five Crore, an enterprise shall be regarded as a small enterprise;
- c. where the annual turnover is more than Rupees Seventy Five Crore but does not exceed Rupees Two Hundred Fifty Crore, an enterprise shall be regarded as a medium enterprise

The amendment empowers Central Government to vary turnover limits, provided not exceeding thrice the limits specified in Section 7 of MSMED Act by issuing notification.

The MSMED Act provides for the memorandum of micro, small and medium enterprises to be submitted by the relevant enterprises to the prescribed authority. The submission of the memorandum by micro and small and medium enterprises engaged in rendering services is optional. The MSMED Act defines a supplier to mean a micro or small enterprise that has filed a memorandum with the concerned authorities in accordance with Section 8 of the MSMED Act. The MSMED Act ensures that the buyer of goods or services makes payment for the goods supplied or services rendered to him immediately or before the date agreed upon between the buyer and supplier. The MSMED Act provides that the agreed period cannot exceed forty five days from the day of acceptance of goods or services. The MSMED Act also stipulates that in case the buyer fails to make payment to the supplier within the agreed period, then the buyer will be liable to pay compound interest at three times of the bank rate notified by the Reserve Bank of India from the date immediately following the date agreed upon. The MSMED Act also provides for the establishment of the Micro and Small Enterprises Facilitation Council (“Council”). The Council has jurisdiction to act as an arbitrator or conciliator in a dispute between the supplier located within its jurisdiction and a buyer located anywhere in India.

Income Tax Act, 1961

Goods and Service Tax (GST)

Goods and Services Tax (GST) is levied on supply of goods or services or both jointly by the Central and State Governments. It was introduced as the Constitution (One Hundred and First Amendment) Act 2017 and is governed by the GST Council. A destination based consumption tax GST would be a dual GST with the center and states simultaneously levying tax with a common base. The GST law is enforced by various acts viz. Central Goods and Services Act, 2017 (CGST), State Goods and Services Tax Act, 2017 (SGST), Union Territory Goods and Services Tax Act, 2017 (UTGST), Integrated Goods and Services Tax Act, 2017 (IGST) and Goods and Services Tax (Compensation to States) Act, 2017 and various rules made there under.

Every person liable to take registration under these Acts shall do so within a period of 30 days from the date on which he becomes liable to registration. The Central/State authority shall issue the registration certificate upon receipt of application. The Certificate shall contain fifteen digit registration numbers known as Goods and Service Tax Identification Number (GSTIN). In case a person has multiple business verticals in multiple locations in a state, a separate application will be made for registration of each and every location. The registered assessee is then required to pay GST as per the rules applicable thereon and file the appropriate returns as applicable thereon.

GST has replaced the following indirect taxes and duties at the central and state levels:

Central Excise Duty, Duties of Excise (Medicinal and Toilet Preparations), additional duties on excise – goods of special importance, textiles and textile products, commonly known as CVD – special additional duty of customs, service tax, central and state surcharges and cesses relating to supply of goods and services, state VAT, Central Sales Tax, Luxury Tax, Entry Tax (all forms), Entertainment and Amusement Tax (except when levied by local bodies), taxes on advertisements, purchase tax, taxes on lotteries, betting and gambling. It is applicable on all goods except for alcohol for human consumption and five petroleum products.

GST council has mandated the implementation of e way bill under GST from April 1, 2018 for interstate movement and from 1st June 2018 for Intra- state Movement of Goods. The E-Way Bill under the GST Regime replaces the Way Bill which was required under the VAT Regime for the movement of Goods. The way bill under the VAT Regime was a physical document which was required to be generated for the movement of goods. The physical document under the VAT Regime has now been replaced with an electronically generated document in the GST Regime.

EWay Bill is an electronic way bill for movement of goods which can be generated on the e-way Bill Portal. Transport of goods of more than ₹ 50,000 (Single Invoice/bill/delivery challan) in value in a vehicle cannot be made by a registered person without an e-way bill. When an e-way bill is generated a unique e-way bill number (EBN) is allocated and is available to the supplier, recipient, and the transporter.

A Registered person or the transporter may choose to generate and carry e-way bill even if the value of goods is less than ₹ 50,000.

The requirement of e-way bills for movement of goods within the States /UT will start from 15th April 2018 in a phased manner by grouping the States/UT into four lots. GST Council in the coming days shall announce this arrangement.

Value Added Tax (“VAT”)

The levy of Sales Tax within the state is governed by the Value Added Tax Act and Rules 2008 (“the VAT Act”) of the respective states. The VAT Act has addressed the problem of Cascading effect (double taxation) that were being levied under the hitherto system of sales tax. Under the current regime of VAT the trader of goods has to pay the tax (VAT) only on the Value added on the goods sold. Hence VAT is a multi-point levy on each of the entities in the supply chain with the facility of set-off of input tax- that is the tax paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. Only the value addition in the hands of each of the entities is subject to tax. Periodical returns are required to be filed with the VAT Department of the respective States by the Company.

Central Sales Tax Act, 1956

In accordance with the Central Sales Tax Act, every dealer registered under the Act shall be required to furnish a return in Form I (Monthly/ Quarterly/ Annually) as required by the State sale Tax laws of the assessee authority together with treasury challan or bank receipt in token of the payment of taxes due.

6. Impairment of Assets

- (i) The company assesses, at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. An asset's (including goodwill) recoverable amount is the higher of an asset's net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.
- (ii) After impairment, depreciation/ amortization is provided on the revised carrying amount of the asset over its remaining useful life.

7. Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. Inventories

Inventories are valued at lower of cost or net realisable value. The cost include cost of purchase, duties & taxes (to the extent not recoverable) and other costs incurred in bringing the inventories to their present location and condition. The cost of the various item of inventories are computed as under:

- Raw materials and stores and spares are valued at cost plus direct expenses and method of valuation is first in first out (FIFO)
- Work-in-progress are valued at raw material cost plus conversion cost depending upon the stage of completion.

Non-monetary items that are measured in terms of historical cost in a foreign currency shall be translated using the exchange rate at the date of the transaction. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements shall be recognised in profit or loss in the period in which they arise.

The company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

14. Contingent Liabilities and Provisions

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“FDI”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), has issued consolidated FDI Policy Circular of 2017 (“FDI Policy 2017”), which is effective from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The Reserve Bank of India (“RBI”) also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated January 4, 2018 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100% foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by Reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any ‘fit and proper/due diligence’ requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
