5. Our business will suffer if we fail to anticipate and develop new services and enhance existing services in order to keep pace with rapid changes in technology and the industries on which we focus.

The IT services market is characterised by rapid technological changes, evolving industry standards, changing client preferences, and new service introductions that could result in technology obsolescence. Our future success will depend on our ability to anticipate these advances, enhance our existing offerings or develop new service offerings to meet client needs, in each case, in a timely manner. We may not be successful in anticipating or responding to these advances on a timely basis, or at all. If we do respond, the services or technologies we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded services, or seamlessly managing new service introductions or transitions. Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. In addition, our success also depends on our ability to proactively manage our portfolio of technology alliances.

Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. Accepting unforeseen business opportunities may also result in a business model change. We cannot guarantee that any adjustment in our future plans will become successful or be more successful than our current business model. A shift in our plans may result in the use of other technologies.

Other technologies may in the future prove to be more efficient and/or economical to us than our current technologies. We cannot guarantee that any change in technology will become successful or be more successful than our current technology.

Moreover, there can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Further, certain statutory and regulatory authority may put certain terms and conditions, which are required to be complied with by us. 9. Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business.

Since we provide services to the customers based at United State of America, Dubai and Israel United Kingdom, we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import/export controls, content requirements, trade restrictions, the environment (including electronic waste), tariffs, taxation, sanctions, government affairs, anti-corruption, whistle blowing, internal and disclosure control obligations, data protection and privacy and labour relations and certain regulatory requirements that are specific to our clients’ industries. Non-compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and/or criminal prosecution, unfavourable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees or other related individuals.

We are subject to risks relating to compliance with a variety of national and local laws, including multiple tax regimes, labour laws, and employee health, safety, wages and benefits laws. Our failure to comply with applicable regulatory requirements could have a material adverse effect on our business, financial condition and results of operations.

10. If our services do not effectively inter-operate with our users existing or future IT infrastructures, installations could be delayed or cancelled, which would harm our business.

Our services must effectively inter-operate with our users existing or future IT infrastructures, which often have different specifications are based on different platforms, deploy products/services from multiple vendors, use various devices, and contain multiple generations of products/services that have been added over time. If we find errors in the existing software and defects in the hardware used in our user’s infrastructure or problematic or incompatible network configurations or settings, we may have to modify our software so that our services can effectively inter-operate with our users

infrastructure and business processes. In addition, to stay competitive within certain markets or to comply with new statutory or regulatory requirements, we may be required to make software modifications in future releases of our offerings. These issues could result in longer sales cycles for our services which may adversely affect our business, financial condition, results of operations and cash flows.

11. We may be liable to our clients for damages caused by system failures, disclosure of confidential information or data security breaches, which could harm our reputation and cause us to lose clients.

Many of our contracts involve contracts that are critical to the operations of our clients' businesses and provide benefits to our clients that may be difficult to quantify. Any failure in a client's system could result in a claim for substantial damages against us, regardless of our responsibility for such failure. In addition, we often have access to, or are required to collect and store, confidential client data. We face a number of threats to our data centres and networks such as unauthorised access, security breaches and other system disruptions. It is critical to our business that our infrastructure remains secure and is perceived by customers to be secure. We seek to rely on encryption and authentication technology licensed from third parties to provide the security and authentication necessary to effect secure online transmission of confidential client information. Despite our security measures, advances in computer capabilities, new discoveries in the field of cryptography or other events or developments may result in a compromise or breach of the algorithms that we use to protect sensitive customer transaction data. Breaches of our security measures or the accidental loss, inadvertent disclosure or unapproved dissemination of confidential customer data could expose us, our customers or the individuals affected to a risk of loss or misuse of this information, or cause interruptions in our operations. We may be required to expend significant capital and other resources to protect against such security breaches, to alleviate problems caused by or to investigate such breaches, all of which could subject us to liability, damage our reputation and diminish the value of our brand name.

Although we attempt to limit our contractual liability for consequential damages in rendering our services. Moreover, if any person, including any of our employees or former employees or subcontractors, penetrates our network security or misappropriates sensitive data, we could be subject to significant liability from our clients or from our clients' customers for breaching contractual confidentiality provisions or privacy laws. Unauthorized disclosure of sensitive or confidential client and customer data, whether through breach of our computer systems, systems failure, loss or theft of assets containing confidential information or otherwise, could render us liable to our clients for damages, damage our reputation and cause us to lose clients.

A successful assertion of one or more large claims against us could adversely affect our revenues and results of operations. We may also be liable to our clients for damages or termination of contract if we are unable to address disruption in services to them with adequate business continuity plans and/or for non-compliance with our clients' information security policies and procedures.

12. Failure to offer customer support in a timely and effective manner may adversely affect our relationships with our customers.

From time to time, our customers require our customer support team to assist them in using our services, help them in resolving post-deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our customers effectively, it could adversely affect our ability to retain existing customers and could prevent prospective customers from adopting our services. We may be unable to respond quickly enough to accommodate short-term increases in demand for customer support. We also may be unable to modify the nature, scope and delivery of our customer support to compete with changes in the support services provided by our competitors. Increased demand for customer support, without corresponding revenue, could increase costs and adversely affect our business, results of operations and financial condition.

Our sales are highly dependent on our business reputation and on positive recommendations from our customers. Any failure to maintain high-quality customer support, or a market perception that we do not maintain high-quality customer support, could adversely affect our reputation, business, results of operations and financial condition.

13. Our logo  is not registered with Trademark Registry under the Trademark Act, 1999 and our ability to use the said trademark may be impaired as we may not be able to protect and/or maintain our right to use the same.

Our ability to market our services depends upon the recognition of our brand names. Our Company's business may be adversely affected due to our inability to protect our existing and future Intellectual Property Rights. Currently, we do not have registered trademark for our Company's logo  under the Trade Marks Act, 1999. We do not enjoy the statutory protections accorded to registered trademarks in India for the said logo of our company. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property.

14. Although our company is engaged in service sector, we have low net profit margins as compared to industry standards.

Although our company is engaged in providing IT and IT enabled services and offering enterprise software development, we have low net profit margins as compared to industry standards in the past. Our company had reported net profit margins of 11.43%, 9.91%, and 9.07% for the financial year ending March 31; 2020, 2019 and 2018 respectively. Due to lower margins, we have lower EPS for our shareholders and may continue to do so. If the margins do not increase over time, we may continue to earn lower profits on higher revenues resulting in slower growth and affect overall financial condition. The management believes that lower margins are mainly due to non-compromise on quality and compliance which is beneficial in the long run. If we are unable to increase our margins, it may affect our growth prospects, profitability, operations and overall financial condition along with ability to absorb the fixed costs, if any, for the producers of new and innovative products.

15. Our investments in technology may not yield the intended results especially on our technical development.

We also engage with our customers in developing intellectual property combining their expert knowledge of the business with our technical expertise. Our choice of focus areas and investments in technology and human capital are based on the management's perception of the IT industry. As at March 31, 2020 the unsecured loan amounting ₹ 32.49 Lakh were due to our Directors cum Promoters. In the event that such lenders seeks further repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. Also there is no formal agreement with such lenders. As a result, any such demand may affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, please refer "Annexure – A.5" and "Annexure – 2.5" - under chapter titled "RESTATED FINANCIAL INFORMATION" on Page no. 112 of Prospectus.

Total unsecured loan taken by our subsidiary company is ₹ 230.53 Lakhs.

17. We are subject to risks associated with expansion into new markets.

Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions.

The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets.

By expanding into new markets, we could be subject to additional risks associated with establishing and conducting operations, including: compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in

- laws, regulations and practices and their interpretation; local preferences and service requirements;
- fluctuations in foreign currency exchange rates;
- inability to effectively enforce contractual or legal rights and adverse tax consequences;
- differing accounting standards and interpretations;
- stringent as well as differing labour and other regulations;
- differing domestic and foreign customs, tariffs and taxes;
- exposure to expropriation or other government actions; and
- Political, economic and social instability.

18. We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.

Our company's almost 100% of the revenue is from export of services, and in order to provide hassle free payment facilities to our clients, we channelized our payment through "Sigma Solve Inc". (**Erstwhile group concern and now subsidiary company w.e.f. October 23, 2019**), having their presence in Florida (USA), Atlanta (Satellite Office) and Australia (Satellite Office). We receive revenue in foreign currency from Sigma Solve Inc. Any changes in value of currencies with respect to the rupee may cause fluctuations in our operating results expressed in rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect our company to the extent of cost of services sold in foreign currency terms. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations.

19. Our success depends in large part upon the strength of our management team and other skilled professionals. If we fail to attract, retain and manage transition of these personnel, our business may be unable to grow and our revenue could decline.

The continued efforts of the senior members of our management team and other skilled professionals are critical to our success. Our ability to execute engagements and to obtain new clients depends in large part on our ability to attract, train, motivate and retain skilled professionals, especially senior management personnel, senior technical personnel, project managers etc. If we cannot hire and retain additional qualified personnel, our ability to obtain new projects and to continue to expand our business will be impaired and our revenue could decline. We believe that there is significant competition within our industry for professionals with the skills necessary to perform the services we offer, particularly in the locations in which we have operations. We may not be able to hire and retain enough skilled and experienced employees to replace those who leave. Increasing competition for technology professionals may also impact our ability to retain personnel. Changes in government policies may also affect our ability to attract hire and retain personnel. If we are unable to offer them higher compensation, we may be unable to attract or retain them. Our business, financial condition and results of operations could be adversely affected if we are unable to manage employee hiring and attrition to achieve a stable and efficient workforce structure.

22. Our operations may be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other industrial unrest or dispute.

While we have not experienced any unrest or dispute in our company in the past, we cannot be certain that we will not suffer any disruption to our operations due to strikes, work stoppages or increased salary demands in the future. Further, if our work force in our unit unionizes in the future, collective bargaining efforts by employee unions may divert our management’s attention and result in increased costs. We may be unable to negotiate acceptable collective wage settlement agreements with those workers who have chosen to be represented by unions, which may lead to union-initiated strikes or work stoppages. Any shortage of skilled and experienced workers caused by such industrial unrest or disputes may adversely affect our business, results of operations and financial condition. Further, under Indian law, we may be held liable for wage payments or benefits and amenities made available to “daily wage” workers. Any requirement to discharge such payment obligations, benefits or amenities or to absorb a significant portion of the salary on our own rolls may adversely affect our business, results of operations and financial condition.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Issue, refer chapter titled "OBJECTS OF THE ISSUE" on Page no. 60 of this Prospectus.

34. Our inability to manage growth could disrupt our business and reduce profitability.

A principal component of our strategy is to continuously grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

35. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

36. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

37. Our business is dependent on the adequate and uninterrupted supply of electrical power.

Our business is dependent on the adequate and uninterrupted supply of electrical power. The shortage or non-availability of power facilities may affect our processes and have an impact on our results of operations and financial condition. Our service processes requires adequate amount of power facilities for operating Systems. We are mainly dependent on Torrent Power Limited for meeting our electricity requirements. Any defaults or non-compliance of the conditions may render us liable for termination or any future changes in terms may lead to increased costs, thereby affecting the profitability.

For further details, please refer to chapter titled “BUSINESS OVERVIEW” beginning on Page no. 74 of the Prospectus.

38. Our inability to effectively implement our business and growth strategy may have an adverse effect on our operation and growth.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

39. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. SECTION VIII – ABOUT US

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the Issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL PERSPECTIVE

The Indian Information Technology/Information Technology enabled Services (IT/ITeS) industry has contributed immensely in positioning the country as a preferred investment destination amongst global investors and creating huge job opportunities in India, as well as in the USA, Europe and other parts of the world. The industry has differentiated itself in the global competition on account of consistent service and guaranteed results and has also helped forge strong bilateral ties with nations.

The Indian IT-Business Process Management (IT-BPM) industry has played a key role in India's economic growth over the last ten years. Over the last decade, the industry has grown over five fold in revenue terms, thus contributing a substantial share to India's GDP. More importantly, the industry has led the economic transformation of the country and altered the perception of India in the global economy.

The global sourcing market continues to grow at a higher pace compared to the IT-BPM industry. The global IT and ITeS market (excluding hardware) expected to reach USD 1.4 trillion in 2018-19 and the global sourcing market reached USD 194-198 billion. India continued as the world's top sourcing destination with a share of about 55 percent. In FY 2017-18, Indian IT and ITeS companies set up over 271 new global delivery centres around the world. IT-industry is fueling the growth of startups in India with the presence of around 7,000-7,200 start-ups making India the world 2nd largest start-up ecosystem. Many of these are working on very niche technologies – AI, blockchain, robotics, analytics, automation, cyber-security etc. These startups, coupled with new and emerging technologies, are enhancing the digital economy of the country and are creating IT and electronics led new job opportunities in both traditional as well as new sectors of the economy, such as, transport, health, power, agriculture, and tourism.

As per NASSCOM's (National Association of Software and Services Companies) estimates for FY 2018-19, industry revenue (excluding hardware) would touch USD 164 billion, up from USD 151 billion in FY 2017-18, showing a growth of over 8%. In addition, e-commerce would fetch over USD 43 billion, assuming the existing 11% Y-o-Y (Year on Year) growth pattern. India's IT-BPM industry revenue is expected to reach USD 181 billion. The industry employs more than 4.1 million people with an addition of about 172,000 people (approx) in FY 2018-19. IT-BPM exports from India are expected to reach USD 136 billion during FY 2018-19, with over 8% growth.

Driven by the increased digital adoption and growing Internet Economy, India's domestic IT-BPM (excluding hardware) is expected to reach USD 28 billion at 8% growth in FY 2018-19. India has the 2nd largest Internet user base after China with over 432 million subscribers, with more than 300 million smartphone users.

The Government has identified Information Technology (IT) and IT enabled Services (ITeS) as one of 12 champion service sectors for realizing their full potential. Government of India has also undertaken a consultative approach with the industry associations and industry members to discuss measures to improve the overall state of the IT industry and key challenges being faced towards realizing the USD 1 trillion digital economy by 2022. Goods and Services Tax (GST) is one of the biggest tax reforms undertaken by the country. Other efforts include measures to streamline the tax regimes, streamlining procedures and improving the overall ease of doing business. Government initiatives, such as, Start-up India, Digital India and Smart Cities are expected to give boost to e-Governance and m-Governance related business activities. There is significant push from the Government to go digital and adoption of digital payments. Efforts are also being made to diversify and increase presence in other markets, such as, Europe (besides UK which is a mature market), Africa, South America, Israel, Australia, China and Japan.

BPM INDUSTRY PROMOTION

MeitY is working towards the vision of Digital Inclusion and to create new opportunities in the digital economy India BPO Promotion Scheme (IBPS) and North East BPO Promotion Scheme (NEBPS) have been initiated in 2015 under IT for Jobs pillar of Digital India programme. These schemes aim to incentivize setting up of BPO/ ITeS operations across the country, particularly in small towns/cities, to create employment opportunities and promote dispersal of the industry

for balanced regional growth. A total of 48,300 seats under IBPS and 5000 seats under NEBPS have been planned till March 2019. Seat distribution to States and UTs was based on population as per 2011 Census. The outlay of the Scheme is ₹ 493 crore (IBPS) and ₹ 50 crore (NEBPS).

Salient Features

Financial Support: These schemes provide financial support up to ₹ 1 lakh per seat in the form of Viability Gap Funding (VGF) towards Capital and Operational expenses for a period of 3 years. Duration of these schemes was up to March 2019, however VGF dispersal is to continue beyond this period.

Special Incentives: These schemes also provide special incentive for promoting local entrepreneur, employment to women and physically challenged persons, setting up operations at other than State capital, and providing employment beyond target.

Effective Implementation: To ensure transparency and smooth implementation of these schemes processes, such as, bidding, reporting, monitoring and disbursement are made completely online and done through dedicated Web Portal www.ibps.stpi.in and www.nebps.stpi.in which are one stop web portal to know bidding details, status, news, alerts and other related information regarding India BPO Promotion Scheme (IBPS) and North East BPO Promotion Scheme (NEBPS). These web portals also provide special login for bidders to submit progress report, raise disbursement requests related to financial support and special incentives etc.

Focus on employment generation through IT/ ITES:

The disbursement of financial support under these schemes is directly linked with the outcome i.e. employment generation.

Location of BPO/ITeS Units under IBPS and NEBPS

Some of the Operation Units are at:

Patna, Muzaffarpur, Raipur, Shimla, Sagar, Bhubaneswar, Cuttack, Jaleswar, Kottakuppam, Bheaderwah, Budgam, Jammu, Sopore, Srinagar, Aurangabad, Bhiwandi, Sangli, Wardha, Bareilly, Kanpur, Varanasi, Guwahati, Jorhat, Kohima, Imphal, Madurai, Mayiladuthurai, Tiruchirappalli, Tiruppattur, Vellore, KarimNagar, Tirupati, Guntupalli, Rajamudry.

Impact

Dispersal of Industry: Growth of IT/ITES sector in India has traditionally remained confined to a few select urban clusters. BPO Promotion Schemes are facilitating in expanding the base of IT/ITeS industry and creation of employment opportunities beyond metros. Under IBPS and NEBPS, 202 units have set up at about 100 locations distributed across 27 States and UTs during the year 2018-19.

Journey towards Digital India through bridging of the digital divide:

The NEBPS and IBPS were launched in 2015 and 2016 respectively. As the location of BPO/ITeS operations is client driven, and the metro cities were excluded from these schemes, the industry response to these schemes was not very encouraging at the beginning but gained momentum over the period of time. The BPO/ITeS units in Tier-II/III cities are changing the digital profile of the nation by creating job opportunities in ITeS sector and developing the ecosystem for the dispersal of IT industry.

Empowerment and inclusion of marginalized groups of the society:

The schemes encourage employment to women and differently abled persons. Under these schemes, special incentives have been provided to the units encouraging employment to women, and specially abled persons. Out of the total employment provided by BPO/ITeS units under these schemes, around one third are women.

Jobs opportunities near home with the ease of living:

The BPO/ITeS units starting in Tier-II/ III locations are providing job opportunities to the youth near their home which would reduce the migration to metros and lower the attrition rate. The BPOs in small towns and cities are providing services in local languages, which would create employment opportunities for the local youth and services provided in local languages that results in better customer satisfaction.

North East BPO Promotion Scheme (NEBPS)

Government has also launched North East BPO Promotion Scheme (NEBPS), under Digital India Programme, to incentivize setting up of 5,000 seats BPO/ITeS Operations in North East Region (NER), create of employment opportunities for the youth and growth of IT-ITeS Industry. NEBPS provides similar financial support as IBPS with outlay of ₹50 crore. Till March, 2019, 15 companies have been selected to set up 20 units for a total of 1,625 seats BPO/ITeS operations spread across the 6 States of NER, namely, Assam, Nagaland, Meghalaya, Manipur, Arunachal Pradesh and Tripura. Out of these, 12 units have started operations for a total of 1,175 seats with initial employment to over 500 persons. Further details of the scheme are available at www.MeitY.gov.in/nebbs and <https://nebbs.stpi.in>.

The Information Technology Act, 2000 provides legal recognition of electronic records and electronic signatures, their use, retention, attribution and security. Penalties are provided for cybercrimes which include tampering with computer source document and electronic publishing of obscene information, in addition to provision of compensation in certain cases. The Information Technology Act, 2000 also provides punishment for offences committed outside India if the act involves a computer system or computer network outside India.

The Employees State Insurance Act, 1948

The promulgation of Employees’ State Insurance Act, 1948 (ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi- dimensional Social Security system, when the country’s economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions. The ESI Act 1948 encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

Software, both in source and object code, constitutes a literary work under Indian law and is afforded copyright protection and the owner of such software becomes entitled to protect his works against unauthorised use and misappropriation of the copyrighted work or a substantial part thereof. OTHER INSTRUCTIONS

JOINT APPLICATIONS IN THE CASE OF INDIVIDUALS

Applications may be made in single or joint names (not more than three). In the case of joint Applications, all payments will be made out in favour of the Applicant whose name appears first in the Application Form or Revision Form. All communications will be addressed to the First Applicant and will be dispatched to his or her address as per the Demographic Details received from the Depository.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications
- II. Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of applications with common DP ID/ beneficiary ID, are manually checked to eliminate possibility of data entry error to determine if they are multiple applications.
- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of “know your client” norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.

An investor making application using any of channels under UPI Payments Mechanism, shall use only his / her own bank account or only his / her own bank account linked UPI ID to make an application in public issues. Applications made using third party bank account or using third party linked bank account UPI ID are liable for rejection. Sponsor Bank shall provide the investors UPI linked bank account details to RTA for purpose of reconciliation. RTA shall undertake technical rejection of all applications to reject applications made using third party bank account.

Duplicate copies of Application Forms downloaded and printed from the website of the Stock Exchange bearing the same application number shall be treated as multiple applications and are liable to be rejected. The Company, in consultation with the Lead Manager reserves the right to reject, in its absolute discretion, all or any multiple applications in any or all categories. In this regard, the procedure which would be followed by the Registrar to the Issue to detect multiple applications is given below:

1. All Applications will be checked for common PAN. For Applicants other than Mutual Funds and FII sub-accounts, Applications bearing the same PAN will be treated as multiple Applications and will be rejected.
2. For Applications from Mutual Funds and FII sub-accounts, submitted under the same PAN, as well as Applications on behalf of the Applicants for whom submission of PAN is not mandatory such as the Central or State Government, an official liquidator or receiver appointed by a court and residents of Sikkim, the Application Forms will be checked for common DP ID and Client ID.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“FDI”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), has issued consolidated FDI Policy Circular of 2017 (“FDI Policy 2017”), which is effective from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT, all investments by entities incorporated in a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government of India, as prescribed in the Consolidated FDI Policy.

The Reserve Bank of India (“RBI”) also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated January 4, 2018 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100% foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include: (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by Reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any ‘fit and proper/due diligence’ requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their

respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
